READING

FOR QUESTIONS 31 TO 35, READ THE PASSAGE AND ANSWER THE QUESTIONS THAT FOLLOW.

Zoo cum botanical garden of Nandankanan covers an area of 400 hectares. The zoo came up way back in 1960. The place is part of World Association of Zoos and Aquariums since 2009. The Garden of Heavens is very near the capital city of Orissa, Bhubaneswar.

Nandankanan Park is near Kanjia Lake. Since the advent of animals at the park, the Lake too has become a popular tourist spot. Both these places offer a great recreational experience.

The first tiger came to the place from Calcutta in 1964. African lions, Puma and Mugger Crocodiles came along with the tiger. The visitors to the place enjoy viewing many species of mammals, birds and reptiles around the place. The forest is famous as a breeding ground for white tigers. Many endangered species of Nilgiri langur, Mouse deer, Sangal lion-tailed macaque and Indian crocodiles can be seen around the place. The zoo has a lovely collection of freshwater fishes in its wonderful Aquaria.

Apart from its Aquaria, the park is famous for its Reptile Park where one comes across lizards, snakes, crocodiles and turtles.

Orchid House at the zoo has a beautiful array of orchids to be viewed and enjoyed.

Zoo remains open to guests from 7:30 in the morning to 5:30 in the evening from April to September. From October to March visiting hours are eight in the morning to five in the evening. For regular maintenance work, the place remains closed for visitors on Mondays.

One can stay at a tourist cottage at Nandankanan on paying ₹ 300. A stay at such a place is an enjoyable thing for people who love photography. Photography is allowed at different fee towards still cameras, digital still cameras, video cameras and movie cameras.

There are lots of things one can do while at the park. Lion Safari, White Tiger Safari, Rope Way, Toy Train, Paddle Boating and Family Boating can be enjoyed around the place.

One can travel to Nandankanan by bus, taxi or auto-rickshaw from Bhubaneshwar. Buses are also available to the park from Bhubaneshwar airport.

Nandankanan Zoological Park commemorates the World Environment Day on 5th June by organising and promoting the day through a series of engaging activities and events generating strong public interest and participation.

The Great Himalayan National Park Conservation Area is located in the western part of the Himalayan Mountains in the northern Indian State of Himachal Pradesh. The 90,540 hectares property includes the upper mountain glacial and snow melt water source origins of the westerly flowing Jiwa Nal, Sainj and Tirthan Rivers

and the north-westerly flowing Parvati River which are all headwater tributaries to the River Beas and subsequently, the Indus River. The property includes an elevational range from high alpine peaks of over 6,000m a.s.l to riverine forest at altitudes below 2,000m a.s.l. The Great Himalayan National Park Conservation Area encompasses the catchments of water supplies which are vital to millions of downstream users.

The property lies within the ecologically distinct Western Himalayas at the junction between two of the world's major biogeographic realms, the Palearctic and Indomalayan Realms. Displaying biotic elements from both these realms, the Great Himalayan National Park Conservation Area protects the monsoon affected forests and alpine meadows of the Himalayan front ranges which sustain a unique biota comprised of many distinct altitude-sensitive ecosystems. The property is home to many plants and animals endemic to the region. The Great Himalayan National Park Conservation Area displays distinct broadleaf and conifer forest types forming mosaics of habitat across steep valley side landscapes. It is a compact, natural and biodiverse protected area system that includes 25 forest types and an associated rich assemblage of fauna species.

The Great Himalayan National Park Conservation Area is at the core of a larger area of surrounding protected areas which form an island of undisturbed environments in the greater Western Himalayan landscape. The diversity of species present is rich; however it is the abundance and health of individual species' populations supported by healthy ecosystem processes where the Great Himalayan National Park Conservation Area demonstrates its outstanding significance for biodiversity conservation.
